## Abrasive wheel grinders safety checklist

Abrasive wheel grinders are an effective tool in completing various work duties in an industrial setting. If used improperly, serious injury can result to employees using this equipment. The checklist below can be used to evaluate the safety and proper use of this equipment to reduce the likelihood of an employee injury.

| SAFETY CHECKLIST   | YES | NO | NI* |
|--|-----|----|-----|
| Are employees trained prior to the use of abrasive wheel grinders?   |     |    |     |
| Do employees use proper PPE when operating grinders, i.e. goggles and face shield?   |     |    |     |
| Is long hair is secured under a hat, in a pony tail or other method to prevent being caught in the rotating wheel?                               |     |    |     |
| Is the work rest used and kept adjusted to within 1/8 inch (0.3175 centimeter) of the wheel?   |     |    |     |
| Is the adjustable tongue on the top side of the grinder used and kept adjusted to within 1/4 inch (0.6350 centimeters) of the wheel?             |     |    |     |
| Do side guards cover the spindle, nut and flange and 75 percent of the wheel diameter?   |     |    |     |
| Are bench and pedestal grinders permanently mounted?   |     |    |     |
| Is the maximum revolutions per minute (rpm) rating of each abrasive wheel compatible with the rpm rating of the grinder motor?                   |     |    |     |
| Are fixed or permanently mounted grinders connected to their electrical supply system with metallic conduit or by other permanent wiring method? |     |    |     |
| Does each grinder have an individual on-and-off control switch?  |     |    |     |
| Is each electrically operated grinder effectively grounded?  |     |    |     |
| Are new abrasive wheels visually inspected and ring tested before they are mounted?  |     |    |     |
| Are dust collectors and powered exhausts provided on grinders used in operations that produce large amounts of dust?                             |     |    |     |
| Are splash guards mounted on grinders that use coolant to prevent the coolant from reaching employees?   |     |    |     |
| Is cleanliness maintained around grinders?   |     |    |     |

\*NI = Needs improvement

UFG Insurance is the marketing name used to refer to United Fire & Casualty Company and its property and casualty subsidiaries and affiliates. This form, supplied by UFG Insurance, merely provides minimum guidelines to follow and may be utilized as a tool for fact-gathering purposes to assist in your investigation.
